

Stealth Bomber Improved

The Pentagon may pay billions for the new Stealth Bomber that flies automatically and is invisible to enemy radar. But, you can have Teac's Stealth Reversing Automated Cassette Deck with dbx that can even record the full dynamic range of CDs for less than the price printed on Teac's February '86 dealer cost sheet.

Stealth's invisible. Enemy radar can't see it. And, it's the newest electronic marvel to come off the drawing board.

Now, you may be thinking that there's not much in common between a Stealth Bomber and an automated cassette deck.

After all, a Stealth Bomber sure can't fly backward. But wait, before you decide.

This automated auto reverse deck has a 'radar avoidance system' called dbx. No, it's not an MX missile. But, if the Stealth Bomber is invisible to radar, wait till you hear how 'invisible' tape hiss will become to your ears with this dbx deck.

Of course it has other 'radar avoidance' in the form of Dolby B & C, but dbx does much more than noise reduction.

When you record using dbx, this deck gives you a 90db signal to noise ratio and an amazing 90db dynamic range. This is one of the few decks that can copy the brilliant impact of CD discs.

AUTOMATIC PILOT PLUS

The Stealth similarity doesn't end at 'radar avoidance'. While the Bomber controls are still top secret, I can tell you a lot about this deck's automated controls.

From the first button you touch, you'll appreciate this deck's total IC logic control. A DC servo controlled motor drives both capstans for low flutter and wow, while a second DC motor operates the unwind and rewind functions.

With record mute, you'll have clean intros and exits to your recordings. And, what recordings you'll get.

In addition to switchable Normal, CrO², and Metal bias switches, you'll have fine bias adjust. You can actually fine tune the bias to decrease or increase high frequency response.

So, you can exactly match the brand of tape you use (DAK, I hope), or tailor the sound to fit your taste. And, you'll make perfect recordings when you use the linear input level controls and sensitive peak reading LED VU meters.

COURSE CORRECTIONS

When you're listening to a tape, you may want to skip to the next song or play the same song over again. This is really useful when you're recording.

Just push the » button during play to automatically advance to the next song. One touch of the « button will automatically return you to the beginning of the song being played. Wow, the Stealth Deck really does have automatic pilot

WRONG WAY CORRIGAN

This autopilot can take you backwards, forwards or around the world again. You can play and record in both directions.

And finally, without even worrying about refueling, you can have your music totally uninterrupted. With just a touch of the button above, you can have your music play over and over again.

Now you only need to get up to change cassettes when you feel like it, not when the cassette ends. It's the best way to enjoy your music, your way.

BUT IT'S THE dbx

While dbx is the ultimate noise reduction system, complete with its vibrant 90db dynamic range, this deck also lets you record and play with Dolby B and C.

But, you just can't get the full-range dynamic hiss free response across the entire frequency range without dbx.

This graph supplied by dbx clearly shows just how good recording with dbx can be. You can easily test the day and night difference for yourself. The test is described in the next column.

The graph above says it all. dbx will give you cassette recordings that are virtually free from surface noise across the

entire frequency range, not just the highs.

Plus, you'll have the incredible vibrance of 90db dynamic range. (The difference between the very softest and loudest possible sounds.) With this deck, you're ready for CD or any possible recording need.

DAK bought over 4000 of these superb decks to get this blockbuster price. Dolby C will give you a 72db signal to noise ratio. There are Left/Right Mike inputs as well as a headphone output.

You'll have a conservative frequency response of 30-16,000hz with CrO² and Metal, and 30-15,000hz with normal bias tapes. It's a top quality deck And, it's backed by Teac's limited warranty.

TRY REVERSING STEALTH RISK FREE

Set your tape counter at 000. Record some blank tape with no input and without noise reduction. At 020, switch in the Dolby B. At 040 switch in Dolby C. At 060, switch in dbx. Then play it back.

You're sure to be astounded. It's a great deck for a lot of reasons. But dbx makes it phenomenal. If you aren't 100% satisfied, simply return it within 30 days in its original box to DAK for a refund.

To order your Teac Stealth Auto Reverse Cassette Deck with Dolby B, Dolby C and dbx risk free with your credit card, call toll free, or send your check for DAK's blockbuster price of just \$149⁹⁰ (\$7 P&H). Order No. 4451. CA res add tax.

The Stealth Bomber is still on the drawing board. And don't forget it still won't fly backwards. But, you can get your own Stealth Deck and be ready to record CDs, live music or just fabulous sounding copies of records.

Of course, the bomber can fly over the mountains in the picture above, the deck can only make them ring with music.
