Sony WM-30 / WM-10 II Window

dengarkanlah.rabingosal.com

Font base
Dolby NR - Eurostile
Model name & features - Helvetica + Mircrosoft Sans Serif (for the R only)

*Silver parts are drawn as grey (20%)

The unit comes in many colors, but there are only 2 window color variants, red & turquoise. Silver, black and pink units use red letterings, while blue, turquoise, and red units use turquoise lettering.

The original window has slightly rounded corners, but I have included a sharp-cornered version that I think is preferable to use if you are trying to make some reproduction windows.
