Frequency range: 126F: FM 88 - 108MHz
MW 530 - 1,600KHz
SW1 2.3 - 7MHz
SW2 7 - 22MHz
126FL: FM 88 - 108MHz
MW 530 - 1,600KHz
LW 150 - 350KHz
SW 6 - 18MHz

Power source: AC 120/220/240V 50/60Hz
DC 15V ("D" size x 10 batteries)
Car battery 13.2V

Speaker impedance: 4Ω
Output power: 110W(PMPO) 14W(RMS) at 10% T.H.D.
Dimensions: 754(W) x 401(H) x 145(D)mm
Weight: Approx. 8.1Kg

C-126F/FL

- High overall output of PMPO 110W (Music 20W)
- The burglar alarm uses infrared rays to detect approaching forms. Place this device close to valuable objects to prevent theft.
- The double-cassette mechanism allows dubbing. Deck A is equipped with a full automatic stop function and deck B is equipped with an automatic reverse function.
- The MSSl (Music Start Search Installation) function repeats or quickly finds any desired music.
- The advanced automatic stop mechanical logic control unit facilitates soft-touch operation. Deck A's one-touch recording mechanism is also very convenient.
- LEDs are used to indicate power, alarm activation, tuning, FM stereo and recording conditions. To indicate accurate reception at a glance, the tuning indicator LED lights up only when tuning is done properly.
- The two-way speaker system, including 20cm woofers, is powerful enough to reproduce low and high frequency sounds.
- The LED tape running indicator monitors tape movement (Utility Model applied for).

C-135F·FL

- High overall output of PMPO 110W (Music 20W).
- The burglar alarm uses infrared rays to detect approaching forms. Place this device close to valuable objects to prevent theft.
- The three-way six speaker system, including 20cm woofers, is powerful enough to reproduce low and high frequency sounds.
- The MSS (Music Start Search Installation) function repeats or quickly finds any desired music.
- The LED tape running indicator monitors tape movement (deck A). (Utility Model applied for)
- The mic mixing function allows mixing to be changed as desired.
- The advanced automatic stop mechanical logic control unit facilitates soft-touch operation.
- Deck A's one-touch recording mechanism is also very convenient.
- The automatic recording function allows proper recording automatically.

Frequency range: 135F: FM 88 - 108MHz

STEREO 4-BAND RADIO DOUBLE CASSETTE RECORDER

- Total 45W music output (RMS 30W), 10% THD.
- A burglar alarm uses infrared rays to detect approaching forms. Place this device close to valuable objects to prevent theft.
- The three-way speaker system, including 20cm woofers, is powerful enough to reproduce sounds ranging from low to high frequencies.
- The double-cassette mechanism allows dubbing. The tape 1 section has a full auto stop function, and the tape 2 section has an auto reverse function.
- The MSS (Music Start Search) function repeats or quickly finds a desired music.
- The LED tape running indicator allows checking of tape movement. (Utility Model applied for.)
- The advanced auto stop mechanical logic control unit included in the deck facilitates soft touch operation. The one-touch recording mechanism is also very convenient.

30W 音响组合

30W MUSIC

- A stereo component system with a receiver, cassette deck, and two speakers. The unit is compact, light, and requires little space.
- The MSSI (Music Start Search Installation) function repeats or quickly finds any desired music.
- Sound quality is changeable as desired due to use of the built-in graphic tone equalizer.
- The LED tape running indicator allows easy confirmation of tape movement. (Utility model applied for)
- The advanced full auto-stop mechanical logic control unit included in the deck facilitates accurate, softtouch operation. The one-touch recording mechanism is also very convenient.
- The three-position tape selector allows normal, chrome, and metal tapes to be played.

2WAY 4SPEAKER SYSTEM

HIGH SPEED HI-FI DUBBING

- Total music output 8W.
- Two-way, four-speaker system.
- Power source: the unit can operate on either household AC power or batteries.
- LED indicator for AM/FM tuning.
- LED indicator for FM stereo.
- LED indicator for power level.
- Built-in graphic equalizer allows you to create your desired sound.
- Double cassette mechanism allows normal speed and double-speed dubbing (High speed hi-fi dubbing), relay play from deck A to deck B and simultaneous playback on both decks.
- Soft-touch mechanism ensures simple soft-touch operation of all buttons. Auto-stop mechanism shuts the unit off when the tape comes to the end during playback or recording.
- Automatic level control circuit automatically controls the sound level to ensure optimum recording.
- In deck A, normal and chrome tapes can be used for recording and playback and metal tapes can be played back. In deck B, normal, chrome, metal and all other tapes can be played back. Deck B automatically identifies the type of tape inserted and adjusts itself in accordance.

STEREO 4-BAND RADIO CASSETTE RECORDER

- Total music output power 27W (P.M.P.O.).
- Power-source: the system can operate on either household current (AC 115/230V selectable) or batteries.
- LED indicator for AM/FM tuning.
- LED indicator for FM stereo.
- Auto-stop mechanism shuts the system off when the tape comes to an end, both during recording and playback.
- Soft-eject mechanism opens the cassette lid smoothly.
- Automatic sound-level controller ensures optimal recording.

Component

- A stereo component system with a deck receiver, and two speakers. The unit is compact, light, and requires little space.
- Sound quality is changeable as desired due to use of the built-in graphic tone equalizer.
- The three-position tape selector allows normal, chrome, and metal tapes to be played.
- The unit is equipped with the built-in spare tape case.
- Automatic recording the ALC (automatic level control) circuit activates automatically when recording inputs from lower levels to higher are detected, and this eliminates inconvenience of adjusting recording levels manually.

ASSETTE RECORDER

- Total music output 17W.
- Two-way, four-speaker system.
- Power source: the unit can operate on either household AC power or batteries.
- LED indicator for AM/FM tuning.
- LED indicator for FM stereo.
- LED indicator for power level.
- Built-in graphic equalizer allows you to create your desired sound.
- Double cassette mechanism allows normal speed and double-speed dubbing (High speed hi-fi dubbing), relay play from deck A to deck B and simultaneous playback on both decks.
- Both decks have an auto-shut-off mechanism that stops the tape travel when the tape comes to the end during playback or recording.
- Automatic level control circuit automatically controls the sound level to ensure optimum recording.
- In deck A, normal and chrome tapes can be used for recording and playback and metal tapes can be played back. In deck B, normal, chrome, metal and all other tapes can be played back. Deck B automatically identifies the type of tape inserted and adjusts itself in accordance.
