

# The Most Convenient... And So Recording Instruments Conceive

In cosmetics and design, the CR-7 and CR-5 mate with Nakamichi Series-7 and Series-5 electronics although either functions perfectly in any system. *Either* can be connected to the Nakamichi CA-7 Control Amplifier and operated via the CA-7's System Remote Control, but neither *need* be operated that way. The CR-7 comes with a wireless remote control unit; the CR-5 is compatible with the optional RM-200 Remote Control.
