

TC-K81

RM-80 Remote Control Unit shown is optional.

Advanced Three-Head Technology for Exceptional Sound

The Sony TC-K81 and TC-K71 offer superb performance and extraordinary convenience in the three-head format.

OUTSTANDING FEATURES

- Sony's exclusive Independent Suspension three-head design for superior performance and off-the-tape monitoring while you record
- Closed-loop dual-capstan system for superior control of tape tension and reduced modulation noise

CONVENIENCE

- Feather-touch controls respond to the slightest finger contact for fast, effortless function selection
- Memory counter brings tape to stop and play at any pre-selected spot
- Auto play offers automatic transfer from rewind into play
- Auto Space/Rec Mute for an interval of silence between selections
- Optional remote control (RM-50) and wireless remote control

(RM-80) permit operation from your easy chair

- Synchronized operation possible with selected Sony turntables, using the optional RM-65
- Fast, 16-segment LED peak program meters, with Double Indication peak hold, for precise readings of recording levels
- Unattended recording and timed wake-up possible with an accessory timer

TECHNOLOGY

- Sendust and Ferrite (S&F) record and playback heads for long life and metal tape capability
- Dolby B noise reduction with Sony's exclusive Dolby IC
- Adjustable bias to achieve flat high-frequency response and low distortion for Type I tapes (K71), or any type of tape (K81)
- Record level calibration for accurate high-frequency sound in Dolby-encoded record and playback (K81 only)
- Two-motor tape drive with frequency servo control for accuracy and reliability
- Anti-resonant flywheel to minimize modulation noise.
