

Digital ready? With AIWA, it's just the beginning.

Now Japan's first manufacturer of stereo cassette decks introduces a digital-ready machine that will set the audio standard for years to come. It's AIWA's AD-F990; with all-new **Dolby HX Professional** circuitry that makes it possible for an analog machine to record every bit and byte of digitally-encoded music with flawless fidelity.

What's more, the AD-F990 wasn't just designed to look like a computer—it also *thinks* like one: with D.A.T.A. tape-matching microprocessor circuitry; auto Dolby* NR detection; auto TAPE/SOURCE switching; and auto recording level adjustment, just to name

a few. AD-F990: so uniquely automated, so simple to use, there's not much left to do but enjoy it. Revolutionary!
