DD-VR9 A Masterpiece in Every Respect — Accuracy, Convenience and Ease of Operation

Three-Head U-Turn Quick Auto-Reverse Direct-Drive Cassette Deck

- U-Turn quick auto-reverse system featuring Flip Reverse Head
- 3-head configuration — JVC Ceramic-clad SA head for recording
- Digital Peak Display with computer accuracy and memory
- Direct drive transport with Pulse Servo motor for top speed accuracy
- B.E.S.T. tuning system for flat response and low distortion
- Dolby B/C noise reduction systems for low-noise recording and playback

The DD-VR9 is a masterpiece in every respect. It is an auto-reverse record/play deck, yet it has three discrete heads. Infrequently used controls are hidden in a slide-out drawer to simplify operation. And extensive use of microcomputers makes the DD-VR9 one of the simplest to use and most versatile decks available.

JVC U-Turn quick auto-reverse mechanism.

The U-Turn auto-reverse mechanism lets you hear or record both sides of a tape automatically.

Since it operates quickly and silently, there's almost no audible break (just under 0.4 seconds) or mechanical noise. The JVC-exclusive "Flip Reverse Head System" allows uniform response in both directions of tape travel. "Jewel lock" prevents head misalignment.

3-head configuration with Ceramic-clad SA record head.

The 3-head configuration, using discrete heads for recording, play and erasure, means extended high-frequency

response, lower noise and, of course, monitor capability. Our new SA (Sen-Alloy) recording head is capped by ceramics to prevent head magnetization and assure smooth tape flow.

Digital Peak Display with memory peak.

The Digital Peak Display lets you read recording levels over the 0 to +12dB range in dB-referred numerals. Highest peaks encountered during play or recording are memorized

and can be instantly recalled, making it easy for you to set the proper recording level.

- Pulse Servo motor for low wow and flutter.
- Motor-driven slide-out control panel.
- Index Scan, Blank Search, Block Repeat, Multi Music Scan.
- 4-Way Digital Counter and fluorescent peak meters.
- Auto rec mute, timer start, remote control (optional R-70E).

Slide-Out Control Panel
