

KD-V6 A High-Performance Model for the Discriminating Audiophile

Discrete Three-Head Cassette Deck

- Discrete 3-head design including SA recording head for top sound plus monitor convenience
- DC-configured amps for signal integrity
- Digital Peak Display with computer accuracy and memory
- 2-motor full-logic control for luxurious pushbutton operation
- Dolby B/C noise reduction systems for low-noise recording and playback
- Index Scan, Block Repeat, and Music Scan

Perfection-minded audiophiles demand that a deck have three discrete heads. We've provided them in the KD-V6, along with many more features for top recording results. It has an SA recording head, DC amps, Dolby B/C noise reduction and JVC's unique digital peak display. Yet we didn't overlook the convenience features. The JVC KD-V6 — for the discriminating audiophile.

Discrete 3-head design featuring SA recording head. Not only does the KD-V6 have three discrete heads — for

record, play and erase — but the record head is our high-performance SA type. The SA head offers high efficiency (low core loss), excellent gap precision, superb wear characteristics and high resistance to corrosion. A solid casting head housing assures perfect head alignment.

DC-configured amps reduce signal loss.

Thanks to DC (direct coupled) amps in the KD-V6, accurate response down to the lowest frequencies is possible. The playback head and its amplifier

are directly coupled — no intermediate capacitor is used — for low noise and distortion and almost no phase distortion. As a result, transient response is improved, and dynamic range is extended.

Digital Peak Display with memory peak.

The KD-V6, being one of our very best models, is blessed with a Digital Peak Display. This JVC-exclusive feature gives the user a readout of the

recording level between 0 and +12dB in easy-to-understand digits. Since peaks are memorized, just a push of a button tells you the highest level in a piece of music you wish to record.

- Switchable MPX filter.
- Electronic tape/elapsed-time counter.
- 2-color fluorescent peak meters.
- Auto tape selector.
- Auto rec mute, timer start, remote control (optional R-70E).
