

# KD-V300

## Our Easiest-to-Use Auto-Reverse Deck

U-Turn Auto-Reverse Cassette Deck

- U-Turn auto-reverse system featuring Flip Reverse Head
- Dolby B/C noise reduction systems for low-noise recording and playback
- Logic control tape mechanism for soft-touch operation
- Music Scan System to locate songs in a flash
- 7-LED multi-peak indicators, one set per channel

Our lowest price deck featuring our U-Turn auto-reverse system with the Flip Reverse Head, the KD-V300 also provides a wealth of top features for superb recording results and top convenience. They include Dolby B/C noise reduction, Music Scan and a logic control mechanism. The KD-V300 is a deck that is a capable and versatile addition to any quality hi-fi system.

### Double your listening pleasure thanks to our U-Turn auto-reverse mechanism.

Like our other auto-reverse decks, the KD-V300 uses our exclusive U-Turn auto-reverse mechanism with the Flip Reverse

head system. This design eliminates the problem of response mismatch that occurs in many other auto-reverse decks. Head misalignment is never a problem.

### Dolby B/C NR — two of the most popular noise reduction systems.

For years, recordists have relied on the effective Dolby B noise reduction system to reduce tape hiss by up to 10dB. Recently, Dolby Laboratories introduced a new version, Dolby C NR, which is capable of reducing unwanted noise by up to 20dB. We've included both systems in the KD-V300 — use

Dolby C NR when you record new tapes, and use Dolby B NR to play your older tapes.

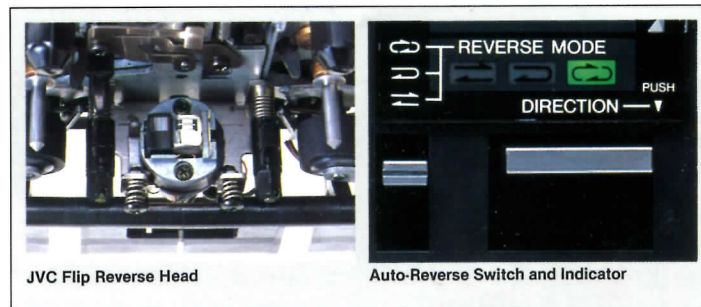

### Soft-touch operation is made possible by the logic control mechanism.

Logic control means both luxurious soft-touch operation and guaranteed tape protection. The built-in logic system assures that a correct sequence of events occurs at the right times, to protect tape from breaking or jamming.

### Music Scan — the easy way to locate songs.

When you touch the PLAY button and then the REW (or FF) button, you are quickly whisked right to the beginning of the next song, or back to the beginning of the song currently in play. In this manner it's easy to locate any particular song on the tape.

- Metal tape compatibility.
- LED tape direction indicators.
- Timer start.
- Rec mute.
