

## KD-W110 Twin Tape Transports Mean Twice the Versatility

Logic Control Double Cassette Deck

- Twin logic control deck mechanisms for soft-touch operation
- Double speed dubbing to cut dubbing time in half
- Continuous play for long listening sessions
- JVC Metaperm heads for excellent results with all tape types including metal
- ANRS/Dolby noise reduction for clean, clear recordings
- Music Scan (Deck A only)

With its two tape transports, the KD-W110 is one of the most versatile model in our lineup. First, its tape dubbing feature lets you copy your favorite tapes, and at double speed if desired. Its Continuous Play feature automatically starts the second tape the second the first tape finishes.

It also has features like our Metaperm heads and ANRS/Dolby noise reduction for superior sound.

- Rec mute (Deck B).
- Timer start (Deck B).
- 6-LED multi-peak indicators.
- Gear/oil-damped cassette lids.

## KD-WR90 Twin Auto-Reverse Transports for up to 3 Hours of Recording or Playback

Twin U-Turn Quick Auto-Reverse Cassette Deck

- Twin U-Turn quick auto-reverse deck mechanisms
- 3 continuous hours of recording or playback (C-90 cassette x 2)
- Two-tape dubbing
- Record on one deck while playing on the other
- Synchro Recording and Synchro rec mute
- Dolby B/C noise reduction systems for hiss-free recordings
- Music Scan (Deck I only)

Never before has there been a deck like the KD-WR90. In its compact case are two record/play tape transports. In addition, both have our U-Turn quick auto-reverse feature. The result is up to 3 continuous hours of recording or playback. It is also possible to record on one deck while listening to a tape in the other.

- 2-motor logic-control tape transports.
- 7-LED peak indicator.
- Auto tape selector.
- Auto rec mute.
- "Synchro" terminal for connection with the turntable or CD (Compact Disc) player.
