

TC 40

Model TC 40 pocket cassette recorder is ideal for interviews, dictation, conferences etc. This little unit is practically effortless to operate—all functional controls are arranged for one hand operation. A built-in electret condenser microphone picks up sound from all directions with astonishing clarity. SONY-O-MATIC recording control automatically adjusts the recording level and SONY's 'Swing Balance' mechanism assures vibration free recording and stable sound quality. Four power sources are available, torch batteries, re-chargeable battery, car/boat battery or AC mains. Take the TC 40 anywhere—you will find it the handiest little tape recorder going!

TC 80L

An extremely versatile recorder packed with easy-to-use facilities, this model is specially designed for educational needs. For learning foreign languages, the TC 80L allows a student's voice on the upper track to be compared word-for-word with the teacher's pre-recorded pronunciation on the lower track. The built-in unique SONY electret condenser microphone, special tape counter, SONY-O-MATIC automatic level control, tape-end alarm and plug-in AC power cord are just some of its additional features. Ideal for use in the school, office or home, the TC 80L comes ready-to-use with a handy black carrying case and demonstration tape.

TC 95

Here is a handy desk top/portable cassette recorder featuring the unique 'review' and 'cue' keys. These keys are particularly useful for language studies, music practice or dictation. Other outstanding features include a built-in SONY electret condenser microphone, SONY-O-MATIC recording level, rich 1.5W output, 3 digit tape counter, recording level/battery check meter, tone control and 4 way power supply, torch batteries, re-chargeable battery pack, 12V car/boat battery supply or AC mains. Model TC 95—a combination of versatility and stylish good looks.

TC 10

This stereo cassette player from SONY brings exciting stereo reproduction into your car. It's so simple; just insert a cassette, press the "SONY INSTALOAD" lever and enjoy your kind of music, both pre-recorded or home produced. Features include fast forward and rewind, tone control and the "INSTALOAD" cassette loading system which assures flawless reproduction unaffected by car motion. Wake up your taste for driving with model TC 10. Model TC 10 is designed for negative ground vehicles only. Speakers shown in illustration are optional accessories, model -SS11

CF 550A

An AM/FM stereo tuner coupled with a stereo cassette recorder which is truly portable. Using SONY's unique matrix sound stereo system model CF 550A reproduces vivid stereo even though both left and right channel speakers are encased in the compact unit. Live stereo recording is also possible from the two sensitive built-in electret condenser microphones. Other features include tape selector switch for standard or chromium dioxide cassettes, automatic shut-off mechanism and SONY-O-MATIC record level control.

Model CF 550A the truly versatile one point stereo system.
